

Elegance through science

Refresh your appearance without surgery!

***"Lunch Lift" at Le MedSpa, the exclusive source for Pellevé for skin tightening
Immediate and lasting improvement.***

The Pellevé treatment can:

- Create visible noticeable results right away
- Provide results that last

HOW DOES IT WORK?

The Pellevé System delivers constant, gradual radiofrequency energy deeply into the skin, causing heat to build up where the skin and fat layer meet. The increasing heat modifies the collagen bundles deep in the skin, causing contraction and stimulating the growth of new collagen over time. The result: firmer, tighter younger looking skin

The wrinkle reduction and skin firming effects of the Pellevé treatment will continue to improve for at least six months as your skin produces new collagen. Over time, Pellevé continues to work, improving your skin texture and tone. In a clinical study, after one treatment, 9 out of 10 patients experienced a significant benefit.

***NOW AVAILABLE AT GRAND JUNCTION'S LEADING DERMATOLOGIST
AND LASER MEDICAL SPA***

Dr. Stiefler chose Pellevé - an advanced radiofrequency technology- because the treatment provides noticeable results with long-term benefits and is a non invasive, non surgical option that provides natural results.

About The Pellevé Treatment:

Available through dermatologists, the Pellevé Wrinkle Reduction System is a proven, gentle, effective, safe and virtually painless cosmetic treatment that reduces wrinkles on the face using advanced radiofrequency technology. To view a video of how Pellevé works, please visit:

Pellevé slowly delivers heat into the deeper layers of the skin, facilitating the growth of new collagen and tightening skin. Patients report that the treatment is both like a deep, warm facial massage and virtually pain free. "A Pellevé treatment can be completed in under an hour and no downtime means clients are back to work and their normal activities immediately – and looking refreshed.

As Dr. Stiefler explains "Another advantage of the Pellevé system is that the tightening occurs within the deeper layers of the skin since the radiofrequency energy is delivered deep into the dermis. With Pellevé, we are actually able to get to the deep tissues to stimulate collagen growth and achieve skin tightening without damaging the surface of the skin. For patients who want

resurfacing, we combine laser treatments with Pellevé, so we can resurface their skin using a gentler mode to reduce the downtime for the patients. The Pellevé System allows us to tailor the procedure to each patient so we can concentrate on the areas where it is needed.”

“Lunch Lift” at Le MedSpa! The result is skin tightening and contouring with a noticeable improvement in skin quality and texture of the face, neck, hands and other body areas.

Le MedSpa is known to offer the latest technology in effective treatments with minimum downtime and maximum results.

**Le MedSpa, the exclusive source for Pellevé in the Grand Valley, is located at:
2530 North 8th Street, Ste 203, Wellington 4 Bldg, Grand Junction, CO 81501**
